

DANIELSON RASOAVELONIRINA

Data Engineer | BI Developer | Big Data & Cloud

Antananarivo, Madagascar | (+261) 34 71 147 49 | d.rasoavelonirina@gmail.com | [LinkedIn](#) | [Portfolio](#)

Experienced Data Engineer (**+8 years**), specialized in the design and implementation of robust data architectures (**Data Lakes, Data Warehouses**) and high-performance **ETL/ELT** pipelines (**Airflow, Nifi, Talend, Spark**). Passionate about transforming raw data into actionable insights via Business Intelligence solutions (**Power BI, Qlik Sense, Tableau**). Good skills on Cloud platforms (**AWS, GCP**) and Big Data ecosystem (**Kafka, Hadoop**). With a Belgian work permit, I'm looking for a challenging position in Data Engineering and/or BI.

TECHNICAL SKILLS

Data Engineering & Pipelines: Apache Spark, Apache Kafka, Apache Nifi, Apache Airflow, Talend, Hadoop (HDFS, etc.), Delta Lake, Data Lake/Warehouse Architecture

Business Intelligence & Visualization: Power BI, Qlik Sense, Tableau, SQL, SAS Base, SAS Enterprise, SAS Visual

Cloud Platforms : AWS (Lambda, EMR, RDS, S3, Terraform), GCP (BigQuery, Dataprep, Dataflow)

Databases: SQL (e.g. PostgreSQL, MySQL), NoSQL, Data Warehousing (BigQuery), DuckDB

Languages & Programming : Python (Data-oriented), SQL, Shell, JavaScript (NodeJS), JAVA

Tools & DevOps: Git, GitLab, Jenkins, Terraform, VTOM, Docker

Frameworks & Data libraries : Pandas, Polars, Dask, FastAPI, Flask

Machine Learning concepts: TensorFlow, PyTorch, Keras, Scikit-learn, Fine-tuning (BERT, LLMs), YOLO

EXPERIENCE

Data & AI Security (Security Department Initialization) - eTech Consulting Madagascar. January 2026 to date
-- Antananarivo, Madagascar

- **Strategic Governance:** Core member of the cross-functional task force responsible for designing the roadmap and operational framework of the company's new Cybersecurity Department..
- **Data Security (SecData):**
 - Architecting and implementing granular access control policies (RBAC/ABAC) across Data Lakes and Cloud environments (AWS/GCP).
 - Enforcing end-to-end data protection through encryption (at rest/in transit), tokenization, and anonymization to ensure GDPR compliance.
 - Designing automated auditing systems to monitor data pipelines and detect anomalous access or potential data exfiltration.
- **AI Security (SecIA):**
 - Developing Security Guardrails for Large Language Models (LLMs) to mitigate risks of prompt injection, jailbreaking, and sensitive data leakage.
 - Implementing robust data-cleansing pipelines to prevent PII (Personally Identifiable Information) from entering AI training sets.
 - Conducting risk assessments on AI model deployments, focusing on adversarial robustness and ethical output filtering.

Data Engineer & Data Quality Manager (outsourcing) - Orange Madagascar TM. April 2023 to December 2026
-- Antananarivo, Madagascar

- Design and deployment of ETL/ELT pipelines (**Apache Nifi, Kafka, Talend, Spark**) for the integration and consolidation of multi-source data (**DATA GSM**).
- Management and optimization of Data Lake / Data Warehouse architecture (**Hadoop, Delta Lake**), improving query performance and scalability.
- Orchestration and monitoring of data processing workflows (**Apache Airflow, VTOM**) to ensure reliability and punctuality of deliverables.
- Development and maintenance of business intelligence dashboards (**Power BI, Qlik Sense, Tableau**) for **KPI** tracking and decision support.
- Implementation of **automated data quality controls**, reducing inconsistencies and improving the reliability of indicators.

Data Analyst (outsourcing) - (Orange Money Madagascar) *Orange Madagascar TM.* April 2022 - April 2023
-- Antananarivo, Madagascar

- Developed and automated strategic dashboards and reports using **SAS Base**, **SAS Enterprise Guide**, and **SAS Visual Analytics**, focused on key Orange Money KPIs (transactions, deposits, withdrawals, commissions, fraud detection).
- Built data-driven dashboards for Marketing, Finance, and Risk teams to monitor commercial and operational performance in near real-time.
- Conducted advanced customer behavior analysis, including segmentation, churn prediction, and usage patterns using SAS analytics tools.
- Worked closely with IT, Compliance, and Payment Systems teams to ensure data integrity and improve data governance practices.
- Provided technical support and training to business users on SAS tools and insights interpretation.

Data Manager & Backend Developer (outsourcing) - RAVATE. 2021 - 2022
-- **Remote: La Réunion**

- Deployment and management of a hybrid data cloud infrastructure (**AWS & on-premise**) via Terraform (**IaC**).
- Design and optimization of databases (**AWS RDS**) for an inventory management application.
- Automated **CI/CD** deployment processes for data and backend components.
- Contributed to backend development (**Node.js**, **AWS Lambda**) of the application, including data access and manipulation logic.

Data Engineer (outsourcing) - Argos Veterinaire & Ghanty Groupe. 2020 - 2021
-- **Remote: La Réunion et Montpellier, France**

- Implementation and optimization of inter-application data processing workflows with **Apache Airflow**.
- Development and maintenance of **ETL/ESB jobs (Talend)** for business data integration and transformation.
- Ensured near real-time data synchronization and consistency between key systems (**SFTP-ODOO**).

Data Scientist - eTech Consulting. 2018 - 2023
-- Antananarivo, Madagascar

- Participation in exploratory analysis and data preparation for classification and recommendation projects.
- Contribution to the technical evaluation and testing of pre-trained models (**BERT**, **LLMs**) for specific use cases.
- Optimization of **LLaMA** and **Qwen-T** models with **LoRA** to reduce **GPU** load.
- Support for proof-of-concept (PoC) development, including image analysis aspects (**YOLO**).

EDUCATION

AI - Programming - Certifier UDACITY 2020

- Mastery of Python and key libraries (Pandas, NumPy) for data manipulation and analysis.
- Programming fundamentals for artificial intelligence and data processing.

Neural Networks and Deep Learning - Certifier COURSERA 2020

- In-depth understanding of neural network principles and Deep Learning architectures.
- Best practices for structuring and evaluating Machine Learning projects.

Telecommunicatoin Master 2 programme - ESPA 2018 - 2019

- Specialization in Information Processing Systems (I.P.S.)

Bachelor's degree in Télécommunication - E.S.P.A 2016 - 2017

- Specialization in Information Processing Systems (I.P.S.)

Data Engineering, Big Data and Machine Learning - GCP Training 2018

- Implementation of Data Engineering solutions on GCP: **BigQuery** (Data Warehouse), Dataflow (**Batch/Stream Pipelines**), **Cloud Storage**, **Pub/Sub**.
- Workflow orchestration (**Cloud Composer**) and ML model integration (**Vertex AI**, **BigQuery ML**).
